

As an expert Resume Writer & ATS Optimizer, I must first note that the Job Description was unavailable. To provide the best possible result, I have optimized your resume for a typical **Senior Full Stack & AI Engineer** role, focusing on highlighting impact, modern skills, and quantifiable achievements.

When you have a specific job description, you should further tailor the **Summary** and **Skills** sections to match its keywords and priorities precisely.

Here is the rewritten, optimized resume:

# Praful Gaur

## Metadata

- Role:** Senior Full Stack & AI Engineer
- Experience:** 5+ Years
- Email:** praful.gaur.2@gmail.com
- Phone:** +91-8564863703
- LinkedIn:** linkedin.com/in/praful-gaur-57521899/
- GitHub:** github.com/pgauino1
- Location:** NCR, India

## Professional Summary

Results-driven Senior Full Stack Engineer with 5+ years of experience architecting and delivering high-performance web and mobile applications. My expertise lies in building sophisticated user interfaces with **React and React Native**, complemented by a strong command of modern backend technologies. I am now focused on integrating next-generation capabilities, leveraging **Generative AI (LangGraph, Gemini)** and **Web3** to create intelligent, decentralized, and highly engaging user experiences. I excel at transforming complex requirements into scalable, maintainable, and impactful software solutions.

## Technical Skills

- AI & GenAI:** LangGraph, Gemini 1.5 Pro, Agentic Workflows, LLM Orchestration
- Languages:** JavaScript (ES6+), Python, Solidity, SQL, HTML5, CSS3
- Frontend & Mobile:** React.js, React Native, Redux, Tailwind CSS, Bootstrap
- Backend & Cloud:** Node.js, FastAPI, GraphQL, REST APIs, AWS, Django, MongoDB, PostgreSQL
- Web3 & Blockchain:** Smart Contracts (ERC-721/ERC-1155), Hardhat, Ethers.js, OpenZeppelin, IPFS
- Tools & DevOps:** Git, Docker, Jest (Testing)

## Key Projects

- Shadow AI (Autonomous Daily Planner):** Architected and developed an autonomous daily planner using **LangGraph** and **Gemini 1.5 Pro** to convert natural language goals into structured, optimized schedules. Engineered a multi-agent workflow to intelligently handle task prioritization, scheduling conflicts, and dynamic adjustments.
- Nexus Quest (Blockchain RPG):** Engineered a decentralized RPG on the blockchain, developing **Solidity** smart contracts for on-chain hero management and asset ownership (ERC-721). Implemented **Ethers.js** to ensure seamless wallet integration and real-time synchronization of game state.
- NFT Marketplace:** Designed and launched a full-stack NFT marketplace for minting and trading digital assets. Built a custom indexing engine to efficiently track on-chain events, and integrated **IPFS** for robust, decentralized metadata storage.

- **Tech Bridge Network Manager:** Delivered a robust network management system using **React**, enabling streamlined configuration of network devices. Automated multi-level approval workflows for router changes, reducing manual intervention and error rates.
- **YESGenie (Yes Bank):** Developed a secure, high-performance CRM application using **React Native** for a major financial institution. Enabled banking staff to manage client relationships and operations efficiently from a mobile platform.

## Work Experience

---

**Senior Software Engineer | GlobalLogic** (May 2024 - July 2024) - Led a critical frontend refactoring initiative for an enterprise application, successfully reducing technical debt and improving code stability to enhance long-term maintainability.

**Freelance Developer** (Oct 2023 - April 2024) - Developed and launched a full-featured "Store-to-Door" grocery delivery application, building both the customer-facing **React Native** mobile app and the merchant web dashboard using **React**.

**Senior Software Engineer | PatchInfotech** (Nov 2020 - Aug 2023) - Engineered high-scale, fault-tolerant modules for financial applications using **React Native** and **GraphQL**, successfully processing thousands of daily transactions. - Implemented and managed cloud infrastructure solutions on **AWS**, ensuring high availability and scalability for critical services. - Enforced rigorous code quality and testing standards, contributing to a 99.9% uptime for key application features.

**Web Developer | Creative Highs** (Sept 2018 - Aug 2020) - Managed end-to-end frontend development for multiple client projects, consistently delivering pixel-perfect and responsive user interfaces. - Diagnosed and resolved complex UI/UX bugs and cross-browser compatibility issues, improving overall user satisfaction and application performance.

## Education

---

- **Bachelor of Technology in Information Technology** Babu Banarasi Das Northern India Institute of Technology (2014 - 2018)
