

As an expert Resume Writer and ATS Optimizer, I have analyzed your profile. The job description was not available, so I have optimized your resume for a typical **Senior Full Stack & AI Engineer** role, highlighting the unique and powerful combination of your skills in modern frontend development, Generative AI, and Web3.

To fully target a specific job, please perform these two final steps: 1. **Re-order the Technical Skills:** Move the skills mentioned earliest and most frequently in the specific job description to the top of each list. 2. **Adjust Keywords:** Scan the job description for specific terminology (e.g., "build RESTful services" vs. "develop APIs") and mirror that language in your experience bullet points.

Here is your tailored resume:

Praful Gaur

Professional Summary

Results-driven Senior Full Stack & AI Engineer with over 5 years of experience architecting and developing intelligent, next-generation applications. My expertise lies at the intersection of **React/React Native**, **Modern Frontend Architecture**, and **Generative AI**, with a proven ability to build everything from complex enterprise dashboards to autonomous AI agents using **LangGraph** and **Gemini 1.5 Pro**. I am passionate about leveraging AI and Web3 technologies to create innovative, high-impact user experiences.

Technical Skills

- AI & GenAI:** LangGraph, Gemini 1.5 Pro, Agentic Workflows, LLM Orchestration
- Frontend & Mobile:** React.js, React Native, Redux, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Tailwind CSS
- Backend & Cloud:** Node.js, Python, FastAPI, GraphQL, REST APIs, AWS, Django
- Databases:** MongoDB, PostgreSQL, SQL
- Web3 & Blockchain:** Solidity, Smart Contracts, Hardhat, Ethers.js, OpenZeppelin, IPFS, ERC-721/ERC-1155
- Tools & DevOps:** Git, Docker, Jest (Testing)

Key Projects

- Shadow AI (Autonomous Daily Planner):** Architected and developed an autonomous daily planner using **LangGraph** and **Gemini 1.5 Pro** to convert natural language goals into structured, optimized schedules. Engineered a multi-agent workflow for dynamic task prioritization, conflict resolution, and calendar integration.
- Nexus Quest (Blockchain RPG):** Engineered a decentralized RPG on the blockchain, developing **Solidity** smart contracts for on-chain hero management and asset ownership (ERC-721). Integrated **Ethers.js** for seamless wallet interaction and real-time game state synchronization.
- NFT Marketplace:** Built a full-stack marketplace for minting and trading digital assets on Ethereum/Solana. Developed a custom indexing engine to monitor on-chain events and utilized **IPFS** for decentralized metadata storage, ensuring data permanence and integrity.

- **Tech Bridge Network Manager:** Delivered a robust internal management system using **React** for configuring network devices and automating multi-level approval workflows for router changes, significantly improving operational efficiency.
- **YESGenie (Yes Bank):** Developed a secure, high-performance CRM application using **React Native** for internal banking operations, enabling streamlined customer and financial data management.

Work Experience

Senior Software Engineer | GlobalLogic (May 2024 - July 2024) - Spearheaded frontend refactoring for enterprise applications, systematically reducing technical debt and enhancing code stability to improve long-term maintainability and performance.

Freelance Developer (Oct 2023 - April 2024) - Engineered and launched full-stack applications for clients in Finance and E-commerce, including a comprehensive "Store-to-Door" grocery delivery platform using React and React Native. - Designed and implemented secure and scalable backend services and REST APIs to support mobile and web clients.

Senior Software Engineer | PatchInfotech (Nov 2020 - Aug 2023) - Developed and scaled critical application modules for high-traffic financial platforms using **React Native** and **GraphQL**, delivering a seamless user experience for thousands of users. - Architected and deployed backend services on **AWS**, implementing robust testing protocols and CI/CD pipelines to ensure application quality and reliability.

Web Developer | Creative Highs (Sept 2018 - Aug 2020) - Owned the end-to-end development lifecycle for client-facing web applications, resolving complex UI/UX challenges to deliver intuitive and responsive user experiences. - Collaborated with designers and stakeholders to translate project requirements into functional, pixel-perfect interfaces using React.js.

Education

- **Bachelor of Technology in Information Technology** Babu Banarasi Das Northern India Institute of Technology (2014 - 2018)
